Specially designed for the Australian market with self embedding head for 12mm Villaboard sheeting. Very economical and very efficient.

Button head stitching screw. Originally designed for attaching metal lath to steel and timber frames. Used in many other applications because head has super low profile.

Trim Head skirting screw. New positive drive square recess. Designed for attaching skirting and architrave to steel or timber studs. Square drive bits available.

The all purpose dry wall screw with a coarse thread. Used mainly for fixing wallboard to timber frame. With a super hard point it will also penetrate 1mm. steel.

Laminating screw for stitching two layers of plasterboard together.

Bugle drill-point screw for attaching gyprock, insulation board, wood etc, to metal studs thicker than 1mm.

Self drilling screws for fixing Villaboard, chipboard or timber to metal studs more than 1mm. thick.

Self-Drill Countersunk wing screw for fixing timber to metal joists or frames

Large Wafer or Button Head. For fixing into metal more than 1mm. thick. Super low profile head.
